## FOREWORD

Following the policy of the Directorate of Research and Development of Community Service, Directorate General of Research and Development Strengthening Ministry of Research, Technology / BRIN (National Research and Innovation Agency) on Decentralization Research in Higher Education, it is deemed necessary to publish a Guidebook for the Implementation of Research at the Universitas Negeri Padang. This guidebook generally refers to the 2019 Guidelines for Implementation of Research and Community Service in Higher Education Edition XII (Revised) published by the Directorate of Research and Community Service. This book contains explanations of policies or research management mechanisms whose funds come from PNBP. Besides, this guidebook also contains a detailed explanation of (1) research schemes, (2) procedures for submitting and selecting research proposals, (3) presentation, (4) monitoring and evaluation of P2M implementation, (5) results seminar, and ( 6) research reporting.

This guidebook is expected to be used as a reference in improving the quality of research program management and guidelines for Universitas Negeri Padang lecturers in carrying out research activities to facilitate the implementation and accountability of research activities. The Research Implementation Guidelines Book of Universitas Negeri Padang is also available on the [sim.lp2m.unp.ac.id](http://sim.lp2m.unp.ac.id) page. We, from the drafting team, would like to express our gratitude and highest appreciation to the Rector, and the Vice Rectors, Dean and Deputy Dean I of UNP, as well as the Director and Deputy Director I of the UNP Postgraduate Program who have provided input in refining this guide through the *Focus Group Discussion* and all members of the drafting team who have worked hard and earnestly until this guidebook was published.

Padang, January 2020  
Head of LP2M UNP,

Signed

Prof. Dr. Yasri, MS.

## **FOREWORD OF RECTOR OF UNIVERSITAS NEGERI PADANG**

The Tridharma of Higher Education's implementation proportionally and in balance is an obligation for every lecturer in Higher Education. Research activities and community service are the two principles of the Tridharma of Higher Education. These two principles need special attention so that lecturers are required to be more creative and provide adequate time to conduct research and community service. In other words, lecturers are not only focused on educational and teaching activities. Besides, with the obligation to fill Lecturer Workload (BKD), it is hoped that lecturers will carry out the obligations of the Tridharma of Higher Education in full.

In reconstructing the economic, social, cultural and political system, the universities must continue to strive to create breakthroughs to support national development as a whole. It means that research needs to be directed at innovation and quick responses to community needs, for example research that produces patents and appropriate technology. However, the field of research need not always be interpreted as being product-oriented by forgetting about science and technology-social and cultural studies which in the long run will also have an impact on economic progress and the nation's competitiveness. Besides, to have a positive impact on society, research activities should not only stop at the reporting stage, but must be followed up in the form of implementing the research results into various community service programs.

Universitas Negeri Padang continues to strive to package research and community service programs simultaneously and continuously following the development of Science and Technology-Social and Cultural Affairs and development needs towards a *research university*. In the short term, Universitas Negeri Padang strives to improve the quality and quantity of research so that all lecturers share a culture of research and service at the Universitas Negeri Padang. In 2016, there were several research schemes funded by PNBPN, namely (1) novice lecturer research, (2) intermediate lecturer research, (3) professor, professor research acceleration research, (5) lecturer research / graduate team research, (6) research on MM lecturers, and (7) research on religious studies. Starting in 2017, Universitas Negeri Padang has allocated research and community service funds amounting to fifteen percent (15%) of the total PNBPN funds. Some of the research programs that will be funded with PNBPN funds are as follows: (1) novice lecturer research, (2) postgraduate team research, (3) research collaborative domestic university, (4) research collaboration overseas university, (5) superior research PT, and (6) applied product research. In 2018 there was an additional research scheme for Cooperation between Domestic Agencies (Government / Non-Government), and in 2019 there was an addition of a particular research scheme for professors. In 2020 there is another addition of new

schemes, namely assignment research schemes, especially innovative research, primary research, applied research, development research, and research center-specific research. For novice lecturers' research schemes, postgraduate research teams (master's thesis), and thorough research for professors, the length of time for other research schemes is two years (*multi-years*).

The policy of increasing the budget allocation for research and community service by fifteen percent (15%) of the total PNPB funds is also expected to increase the quantity and quality of research outputs and community service conducted by lecturers. The research output in question includes (1) scientific publication articles in accredited national journals or reputable international journals, or proceedings at international scientific seminars, (2) HKI, (3) teaching materials or textbook sections, models or prototypes that can be used for students, (4) completion of student studies, (5) creation of collaborative researchers between universities, (6) works of art that are staged, exhibited or aired, performances, exhibitions, and art screenings that are strategic and on a national or international scale; a documentary book containing works of art and performances, exhibitions, and screenings.

I believe that this research program guide will receive a warm welcome from lecturers at Universitas Negeri Padang. I am happy to welcome the publication of this Research Guide book. Hopefully it can further increase the interest and quality of research conducted by lecturers. I appreciate the efforts of the Chairperson of the Institute for Research and Community Service (LP2M) and the Head of the Research Center, Universitas Negeri Padang and all staff who always optimize their performance in managing higher quality research. Happy researching and serving. Congratulations on working towards a superior university and for a better future for the nation.

Padang, January 2020  
Rector of  
Universitas Negeri Padang,

Signed.

Prof. Ganefri, Ph.D.

## **CHAPTER 1**

### **INTRODUCTION**

The quality of education in tertiary institutions is greatly influenced by the quality of human resources involved in the education process. Lecturers constitute a significant component in the educational process. They are required always to develop science, technology, and arts (IPTEKS) which can be a source of energy for the education process and service to the community. Thus, graduates who have high knowledge and excellent mastery of technology and arts will produce. To achieve this qualification, a character development process is also required for students to achieve good cooperation skills, leadership skills, adequate experience in research and community service activities, the ability to express ideas, and the results of scientific activities in written form. Therefore, it is necessary to develop scientific activities that involve both lecturers and students in a synergy that is beneficial for lecturers and students' professional development.

In carrying out their duties, lecturers are obliged to carry out the higher Tridharma of Higher Education in a comprehensive and balanced manner in the form of educational and teaching activities, research, and community service. Article 20 of Law Number 20 of 2003 concerning the National Education System states that tertiary institutions are obliged to carry out research and community service and carry out education and teaching. To be able to carry out these research obligations, universities are required to have competent lecturers who can compile research proposals, carry out research, disseminate research results, and produce various technological, artistic and cultural processes and products that can produce Intellectual Property Rights (IPR) in order to improve the dignity of the nation. To achieve this goal, research must be carried out professionally with the principles of being accountable, transparent, and referring to the research quality assurance system. Furthermore, in Permenristekdikti No. 20 of 2018 concerning Research also explains that research activities in higher education are carried out through competitions and assignments. UNP Rector Regulation No. 6059 of 2018 concerning Research Implementation also explains that more technical provisions regarding research implementation will be further regulated in the research guidebook.

To support the achievement of the objectives of implementing the Tridharma of Higher Education and in line with one of the missions of the Rector of the Universitas Negeri Padang, the Institute for Research and Community Service (LP2M) Universitas Negeri Padang always increases the quantity and quality of research at Universitas Negeri Padang and always encourages and facilitates lecturers in carrying out research activities to improve the quality of higher education, the nation's competitiveness, and the people's welfare in a programmed and

sustainable manner. Starting in 2017, Universitas Negeri Padang plans to provide grants on a competitive basis for lecturer research and is expected to involve students in the proposed research process. This grant is an award for lecturers who constantly take part in research activities that produce their work in developing their knowledge and works that the wider community can practically utilize. This program focuses on the development of lecturers' careers and the development of innovations that can foster students' academic competences. Through this research activity, it is hoped that lecturers' professionalism can be more motivated and there will be an increase in the quality of Universitas Negeri Padang graduates as a whole. Other benefits that will be obtained are accelerating student final assignments and supporting the Ministry of Research, Technology and Higher Education's program regarding the obligation to publish scientific papers for students.

The Internal Research Program at Universitas Negeri Padang covers all scientific fields, namely religion, economy, law, health, sports, Mathematics and Natural Sciences, education, psychology, engineering, literature, socio-humanities, religion, art, and culture through several research schemes, namely (1) research by novice lecturers, (2) postgraduate team research, (3) Special Research for Professors, (4) research collaborative for domestic universities, (5) research on foreign universities' collaborations, (6) superior research for Higher Education, (7) collaborative research between domestic agencies, (8) Assignment Research, (9) Basic Research, (10) Applied Research, (11) Development Research, and (12) Special Research Center Studies through PNBP funding sources. Apart from the schemes above, there are independent research schemes that are self-financed by the lecturers.

Besides, research carried out at Universitas Negeri Padang should act as an ivory tower that is high above and far from the community's reach. Research results that have been made should not only be stored or enjoyed by certain groups, namely researchers at UNP. Research carried out by UNP lecturers should produce benefits that the community can use or felt, both the community in the broad sense and the community in the narrow sense, such as the school community. As much as possible will result in recognition of IPR from the authorized institution.

The downstreaming of research referred to in this case is the implementation of research methods in various ways, so that the public can enjoy the results. For example, research is oriented towards benefits, such as ways to prevent floods or research that can be applied in the industrial world. The results of research or research should not just stop being reports, published and patented. However, it must be a product that can be commercialized for the welfare of the community. To downstream research results, it does not have to be in large industries. The application can also directly touch the layers of society (small industry). To maximize the downstreaming of this research, UNP can work with the government and the private sector.

## **CHAPTER 2**

# **GENERAL PROVISIONS OF RESEARCH IMPLEMENTATION AT UNIVERSITAS NEGERI PADANG**

To ensure that the implementation of research by Universitas Negeri Padang lecturers is following research quality assurance standards in tertiary institutions and facilitating researchers in preparing proposals, several provisions have been established.

### **A. General**

1. Proposals that are forwarded to the reviewer are proposals that meet the requirements / conditions set out following the 2020 UNP Research Guidelines' SKIM.
2. Each research proposal submitted must attach a statement of originality signed by the proposed team's head on paper stamped 6000 .
3. Budget provided and duration of activity for each type of study refer to the provision presented in Table 2.
4. The color of the cover research reports for each type of study tailored to the Applicants faculty of color, for instance postgraduate use gray color
5. Researchers(Chairman and Members) are permanent lecturers of UNP which has a National Lecturer Identification Number (NIDN).
6. The research proposal is proposed through the Institute for Research and Community Service (LP2M), Universitas Negeri Padang.
7. **Each researcher may only be involved in a maximum of 1 research title as chairman and 1 more title as a member; or 2 titles as member in the same year under different schemes (including research funded by other funders).**
8. **Especially for Applicantss who have an  $h\text{-Index} \geq 2$  for the social-humanities field and  $h\text{-Index} \geq 3$  for the science-technology sector obtained from reputable international indexing institutions, they can submit research proposals of up to no more than four proposals (2 as chairperson and 2 as members; or 1 as chairman 3 as members; or 4 as members).**
9. Specifically for the Postgraduate Team Research scheme (PTM and PDD), the applicant may submit a maximum of two (2) proposals either as chairman or member (including those that DRPM has funded), but excluding the provisions of points 7 and 8.
10. Research activities are terminated prematurely. the result: (a) negligence of researchers; (b) proven to have duplicated LP2M funding; (c) re-proposing research and community service that has been previously funded, the Head of Research is not allowed to propose Research funded by Universitas Negeri Padang for 2 (two) consecutive years and is required to return Research funds to the state treasury.

11. Researchers must upload progress reports according to a set schedule.
12. **Outcomes progress that have been defined in the proposal must be uploaded (*draft, submitted, accepted, published*) online the system to <http://sim.lp2m.unp.ac.id> by attaching the physical evidence.**
13. The Institute for Research and Community Service (LP2M), Universitas Negeri Padang has the authority to control all research and service activities and impose sanctions for all irregularities committed by researchers.
14. Researchers are required to create a *logbook*. *Logbook is filled in [inputtedsim.lp2m.unp.ac.id](http://inputtedsim.lp2m.unp.ac.id); contains notes detailed on the research's substance, including materials, data, methods, analysis, results, and others deemed necessary. The logbook is kept by the researcher which can be used as evidence in submitting the KI.*
15. Researchers who fail to meet the outcomes according to the scheme's target may be subject to sanctions in the form of:
  - a. Termination of ongoing research for multi-years researchers.
  - b. Research termination in the following year is for researchers who have not fulfilled the research output until they have fulfilled the research outcome.
  - c. Termination or refund the research funds to the state treasury.

## **B. Research Proposal Selection System**

Universitas Negeri Padang prepares internal research proposal selection guidelines which contain the following principles:

1. Universitas Negeri Padang publicly announces research activities attended by lecturers and / or research units using a competition system.
2. Research proposals are selected online by a team of internal reviewers and external reviewers.
3. If necessary, the prospective research lecturer must present his research proposal in front of the Review Team determined by LP2M.

## **C. Research Contract Implementation**

Research contracts are carried out by following the following conditions:

1. The Research and Community Service Institute enters into a research work agreement with the head researcher whose proposal has passed the selection.
2. The research is carried out according to the schedule that has been determined in each fiscal year.
3. The Institute for Research and Community Service UNP conducts internal monitoring and

evaluation of research implementation in the field.

- 4. Each researcher and service worker must create and complete a LOG BOOK of activities that must be shown during money.**
5. The monitoring and evaluation results are used as a basis for consideration for the continuation of research funding for the following year.
6. The head researcher is obliged to present and report his research results every year (progress reports and final reports) and the final research report to LP2M Universitas Negeri Padang.
7. If the head researcher is unable to attend at the reporting time, the reporting can be authorized to the member provided that:
  - a. In the following year (for multi-year research), the researcher's member concerned automatically becomes the head researcher.
  - b. The head researcher must make a Power of Attorney and legalized by the Chairperson of LP2M.

**Table 1. Types of Research Schemes and Budget and Length of Research**

UNP / PNBP Internal Research Schemes	Description	Output	Requirements for Research Team	Maximum Budget (Rp. Million)	Maximum Time (years)
1. Novice Lecturers Research (PDP)	Novice Lecturers Research Program (PDP) is intended as a research activity to foster and direct novice researchers to improve their ability to carry out research and publish their research results in both national and international scientific journals. This scheme is expected to initiate the preparation of a research roadmap for Applicantss.	<p><b>Required:</b></p> <ol style="list-style-type: none"> <li>1. Publication of scientific articles in reputable international seminar proceedings.</li> </ol> <p><b>Additional:</b></p> <ol style="list-style-type: none"> <li>1. Teaching materials or Textbook sections that can be used for students / students.</li> <li>2. Science and technology and social and cultural products can be in the form of methods, blue prints, prototypes, systems, policies, models, or appropriate technology protected by KI.</li> </ol>	<ol style="list-style-type: none"> <li>1. The Applicants is a permanent lecturer at UNP;</li> <li>2. The head Applicants has a maximum education of S2 with a maximum functional position as expert assistant or does not yet have a functional position;</li> <li>3. The head researcher must be guided by a senior lecturer (at least Head Lector or Doctoral degree).</li> <li>4. The member proposing 1-2 people has a leading position as Expert Assistant.</li> <li>5. Applicants may only get the PDP scheme twice as chairman.</li> </ol>	20	1

UNP / PNB Internal Research Schemes	Description	Output	Requirements for Research Team	Maximum Budget (Rp. Million)	Maximum Time (years)
2. Postgraduate Team Research (PTM and PDD)	Postgraduate Team Research is research based on institutions and can be followed by lecturers to improve the quality of research, supervision (promoters and co-promoters at the master and or doctoral level), and improve competency and competency aspects. The scientific quality of graduates and teaching staff at Postgraduate institutions. One indicator of the increasing competence of graduates and teaching staff at postgraduate institutions is the ability to write and publish research results through articles in reputable international journals. The Research Scheme of the Postgraduate Team includes Master Thesis Research (PTM), Doctoral Dissertation Research (PDD)	<p><b>PTM</b></p> <p><b>Mandatory :</b></p> <ol style="list-style-type: none"> <li>1) One article in a national journal accredited Sinta 1-3; or international journals; or indexed / reputable international seminar proceedings. The guidance student is the first author and the lead researcher (supervisor) is the <i>corresponding author</i>.</li> <li>2) Completing graduate student studies.</li> </ol> <p><b>Additional :</b></p> <ol style="list-style-type: none"> <li>1) Teaching materials or Textbook sections that can be used for postgraduate students.</li> <li>2) One product of science and technology and social and cultural affairs can be in the form of methods, blue prints, prototypes, systems, policies, models, or appropriate technology protected by KI for each student.</li> </ol> <p><b>PDD</b></p> <p><b>Mandatory :</b></p> <ol style="list-style-type: none"> <li>1) Year One: Publication of two articles in reputable international proceedings where the</li> </ol>	<p><b>PTM</b></p> <ol style="list-style-type: none"> <li>1. The head of the Applicants is a permanent lecturer who teaches the Postgraduate Program at the Universitas Negeri Padang;</li> <li>2. The Head Researcher has a doctorate (S3) who is guiding at least one full time master student in the Postgraduate Program at Universitas Negeri Padang; and</li> <li>3. Applicants members consist of assistant supervisors (if any) and one master student who supervises them.</li> </ol> <p><b>PDD</b></p> <ol style="list-style-type: none"> <li>1. ## **CHAPTER 3**

### **NOVICE LECTURERS RESEARCH**

#### **A. Introduction**

The Novice Lecturers Research Program (PDP) is intended as a research activity to foster and direct novice researchers to improve their ability to carry out research and publish their research results in both national and international scientific journals. This scheme is expected to initiate the preparation of a research roadmap for Applicants. The research results of this scheme are at TKT 1 - 6 levels.

The PDP research objectives are:

1. To develop and improve the research ability of novice lecturers;
2. Become a training tool for novice lecturers to publish their research results in scientific journals, at least a national journal with ISSN; and
3. Initiating the preparation of the research roadmap.

#### **B. Research Output**

The mandatory PDP output is the publication of scientific articles in seminar proceedings internationally reputable. This research is also expected to produce different outcomes referring to Table 1.

#### **C. Research Criteria**

The PDP criteria follow the following conditions:

1. PDP financing refers to the LP2M Proker as shown in Table 1;
2. The research period is one year.

#### **D. Applicants Requirements**

Requirements for proposing PDP are as follows:

1. Applicants are permanent lecturers at UNP;
2. The head Applicants has a maximum education of S2 with a maximum functional position as expert assistant;
3. The head researcher must be guided by a senior lecturer (at least Head Lector or Doctoral degree).
4. Applicants member 1-2 people; and
5. Applicants may only get the PDP scheme twice as chairman or member.

#### **E. Components of the Proposal**

Beginner Lecturer Research proposal contains the following components.

1. **Research Title.** The study's title should be brief and specific, but sufficiently clear to give an overview of the proposed research.
2. **Cover of proposal** according to the format as attached.
3. **Field of Science.** Write down the field of science of the chief researcher based on the following clusters of knowledge: (1) Education and Educational Sciences, (2) Energy, Science, and Engineering Technology, (3) Food, Health, and Sports, (4) Social, Cultural, Art, Sport and Humanities, (4) Disaster and Environment, (5) Resources, Economics and Business, and (6) Social, Arts, Culture, and Humanities.
4. **Abstract (Summary).** Contains no more than 500 words containing the research

- background, objectives and stages of the research method, targeted outcomes, and descriptions of the proposed research TKT.
5. **Introduction.** Contains no more than 500 words containing the background and problems to be studied, specific objectives, and the urgency of the research. In this section it is necessary to explain a description of the specific specifications related to the scheme.
  6. **Literature Review.** Literature review is not more than 1000 words by presenting the *state of the art and the (road map road map)* in the field under study. The charts and *road maps* are made in JPG / PNG form inserted in this field. Reference sources / primary references relevant and by prioritizing research results in the latest scientific journals and / or patents. It is recommended to use the library sources for the last 10 years
  7. **Research Methods.** The method or means to achieve predetermined goals should not exceed 600 words. This section is equipped with a research flow chart that illustrates what has been implemented and will be done during the proposed time. The flow chart format can be JPG / PNG files. The research chart must be made in its entirety with clear phases, starting from the beginning, how the process and its outputs are, and the targeted achievement indicators. In this section, each member of the Applicants must also fill in the duties according to the proposed research stage.
  8. **Schedule Research and Costs.** The research schedule is arranged in tabular form like the Research Proposal Template example (See Appendix 5). Research costs are made as detailed as possible in 4 components (Honorarium, Material Shopping, Non-Operational Goods shopping, Travel Shopping).
  9. **Bibliography (Reference).** Bibliography is arranged and written based on a number system under the order of citation. Only references cited on research proposals are listed in the Bibliography. The list of references is compiled based on the name and year system in alphabetical order, the author's name, the year of publication, the title of the article / book, and the place / city of the publisher and publisher institution. For references originating from scientific journals, it is necessary to include the name of the journal, volume and publication number, and the page where the article was published.
  10. **Attachments.** In the appendix, at least (a) research personnel and (b) must be attached, *curriculum vitae of the brief chairperson* and research members list including the identity of the researcher, the subjects taught, educational history, and research and community service experience for the last 5 years, and scientific publications for the last 5 years (books, articles in *proceedings*, articles in journals, and the like).

## F. Proposal Template

A novice lecturer research (PDP) includes the following.

COVER OF PROPOSAL

TABLE OF CONTENTS

ABSTRACT (SUMMARY) (maximum 500 words)

INTRODUCTION (maximum 500 words)

LITERATURE REVIEW (Maximum 1000 words)

RESEARCH METHOD (Maximum 600 words)

SCHEDULE RESEARCH(See sample template)

RESEARCH COSTS

REFERENCES

Appendixes

Appendix 1 Research personnel

Appendix 2 List of CVs (*Curriculum Vitae*) Chairman and Research personnel

Forms of this appendixes can be found in the Appendix of this Research Handbook

## CHAPTER 4

### POSTGRADUATE TEAM RESEARCH

#### A. Introduction

Postgraduate Team Research is research based on institutions and can be followed by lecturers to improve the quality of research, supervision (promoters and *co-promoters* at the master and or doctoral level), and improve competency aspects scientific quality of graduates and personnel lecturer at the Postgraduate institution. One indicator of the increasing competence of graduates and teaching staff at postgraduate institutions is the ability to write and publish research results through articles in reputable international journals.

As the issuance of the Circular of the Director General of Higher Education 152 / E / T / 2012 concerning the imposition of publication obligations for graduates up to the doctoral level, it is a strategic step to improve the quality of graduates which will also have an impact on the quality of graduates. Efforts to increase research productivity and its consequences with the publication of scientific papers in tertiary institutions are the provision of research assistance for postgraduate students. The research scheme for the Postgraduate Team includes Masters Thesis Research (PTM), Doctoral Dissertation Research (PDD).

The research objectives of the Masters Thesis (PTM) are as follows:

1. To produce master graduates who can compile ideas, thoughts, and scientific or technical arguments responsibly and based on academic ethics, and communicate them through the media to the academic community and the wider community;
2. Increase the number and quality of scientific publications both at the national and international levels;
3. Accelerate completion of master studies to increase the number and competence of master program graduates; and
4. Creating a more dynamic and conducive academic climate in the university environment, so that the relationship between lecturers and students becomes more interactive and high quality.

While the objectives of the Doctoral Dissertation Research (PDD) are as follows:

1. To produce doctoral graduates who can discover or develop new scientific theories / conceptions / ideas, contribute to the development and practice of science and / or technology that pay attention to and apply the value of humanities in their fields of expertise, by producing scientific research based on scientific methodology, logical, critical, systematic, and creative thinking, or producing applied doctoral graduates who can discover, create, and make new contributions to the development and practice of science and / or technology that pays attention to and applies the values of the humanities in their field of expertise, by producing design work, prototypes, or technological innovations with added value or that can be used for problem solving based on logical, critical, creative, and wise thinking;
2. Increase the number and quality of scientific publications at the international level;
3. Accelerate completion of doctoral studies to increase the number and competence of doctoral program graduates; and
4. Creating a more dynamic and conducive academic climate for postgraduate institutions in the higher education environment. The relationship between lecturers and students becomes more interactive and of high quality.

## **B. Research Output**

PTM compulsory output is one article published in an accredited national scientific journal for each student; or One article in reputable indexed international seminar proceedings for each student; and finish the graduate student studies.

Whereas the mandatory output of PDD is the publication of two scientific articles in reputable international seminar proceedings in the first year (one article by the head researcher as the first author and the student as a member of the writer; and the other article by the student as the first author and the lead researcher as the *corresponding author*). Furthermore, in the second year it is mandatory to publish in reputable international journals; and complete doctoral student studies.

This research is also expected to produce other outcomes as described in Table 1.

## **C. Research Criteria**

PTM criteria follow the following conditions:

1. The research proposal is part of the research umbrella as the thesis material of at least two masters of the Applicants guidance; and
2. a research period of 1 year with a maximum amount of cost as listed in Table 1.

While the criteria for PDD follow the following conditions:

1. Research proposals are part of the research umbrella as the dissertation material of at least one doctoral student guidance Applicants; and
2. a research period of 1-2 years with the maximum amount of the cost as listed in Table 1 to finance the research for the guidance student's dissertation.

## **D. Applicants Requirements**

Requirements for proposing PTM are as follows:

1. The head of the Applicants is a permanent lecturer who teaches in the Postgraduate Program at the Universitas Negeri Padang;
2. The Head Researcher has a doctorate (S3) who is guiding a minimum of two master students; and
3. Applicants members consist of a supervisor and two master students (minimum semester 2).
4. Research members have at least a Doctorate (S3) title and at least have expert

assistant position. While the requirements for proposing PDD are as follows:

1. The head of the Applicants is a permanent lecturer who teaches at the Postgraduate Program at the Universitas Negeri Padang;
2. The head of the Applicants has a doctoral degree (S-3), and has guidance from domestic and / or foreign doctoral program students, both *doctor by course* and *doctor by research program*;
3. The lead Applicants has published experience of at least two articles as a *corresponding author* in a reputable international journal; and
4. Team members consist of a *co-promoter* and one doctoral student (minimum semester 4).
5. The doctoral student guidance comes from lecturers or UNP staff.

## **E. Proposal Component**

The research proposal component for the Postgraduate Team is systematically defined

as follows.

1. **Research Title.** The study's title should be brief and specific, but sufficiently clear to give an overview of the proposed research.
2. **Cover of proposal** according to the format as attached.
3. **Field of Science.** Write down the field of science of the chief researcher based on the following clusters of knowledge: (1) Education and Educational Sciences, (2) Energy, Science, and Engineering Technology, (3) Food, Health, and Sports, (4) Social, Cultural, Art, Sport and Humanities, (4) Disaster and Environment, (5) Resources, Economics and Business, and (6) Social, Arts, Culture, and Humanities.
4. **Abstract (Summary).** Contains no more than 500 words containing the research background, objectives and stages of the research method, targeted outcomes, and descriptions of the proposed research TKT.
5. **Introduction.** Contains no more than 500 words containing the background and problems to be studied, specific objectives, and the urgency of the research. In this section it is necessary to explain a description of the specific specifications related to the scheme.
6. **Literature Review.** Literature review is not more than 1000 words by presenting the *state of the art and the(road map road map)* in the field under study. The charts and *road maps are* made in JPG / PNG form inserted in this field. Reference sources / primary references relevant and by prioritizing research results in the latest scientific journals and / or patents. It is recommended to use the library sources for the last 10 years
7. **Research Methods.** The method or means to achieve predetermined goals should not exceed 600 words. This section is equipped with a research flow chart that illustrates what has been implemented and will be done during the proposed time. The flow chart format can be JPG / PNG files. The research chart must be made in its entirety with clear phases, starting from the beginning, how the process and its outputs are, and the targeted achievement indicators. In this section, each member of the Applicants must also fill in the duties according to the proposed research stage.
8. **Schedule Research And Costs.** The research schedule is arranged in tabular form like the Research Proposal Template example (See Appendix 5). Research costs are made as detailed as possible in 4 components (Honorarium, Material Shopping, Non-Operational Goods shopping, Travel Shopping).
9. **Bibliography (Reference).** Bibliography is arranged and written based on a number system following the order of citation. Only references cited on research proposals are listed in the Bibliography. The list of references is compiled based on the name and year system in alphabetical order, the author's name, the year of publication, the title of the article / book, and the place / city of the publisher and publisher institution. For references originating from scientific journals, it is necessary to include the name of the journal, volume and publication number, and the page where the article was published.
10. **Attachments.** In the appendix, at least (a) research personnel and (b) must be attached, *curriculum vitae of the brief chairperson* and research members list including the identity of the researcher, the subjects taught, educational history, and research and community service experience for the last 5 years, and scientific publications for the last 5 years (books, articles in *proceedings*, articles in journals,

and the like).

## **F. Proposal Template**

A Postgraduate Team's research includes the following.

COVER OF PROPOSAL

TABLE OF CONTENTS

ABSTRACT (SUMMARY) (maximum 500 words)

INTRODUCTION (maximum 500 words)

LITERATURE REVIEW (Maximum 1000 words)

RESEARCH METHOD (Maximum 600 words)

SCHEDULE RESEARCH(See sample template)

RESEARCH COSTS

REFERENCES

Appendixes

Appendix 1 Research personnel

Appendix 2 List of CVs (*Curriculum Vitae*) Chairman and Research personnel

Forms of this appendixes can be found in the Appendix of this Research Handbook

### ***Continuation Proposal***

## CHAPTER 5

### PROFESSOR SPECIAL RESEARCH

#### A. Introduction

Special Research for Professors (PK-GB) is research based on scientific fields owned by professors that professors can only follow to improve the quality and scientific development of professors. One indicator of the professors' increasing quality and scientific development is the birth of scientific publications (articles) in various reputable international journals, especially those indexed by Scopus or Thomson Reuters.

The research objectives for the Special Professors (PK-GB) are as follows:

1. Improve the quality and develop the knowledge of the Professors in the UNP Padang;
2. Increasing the quantity and quality of the scientific publications of the UNP Professor in reputable international journals, especially those indexed by Scopus or Thomson Reuters.

#### B. Research Output

PK-GB mandatory output is the publication of one article in reputable international seminar proceedings in the first year and one scientific article. The lead researcher is the first author in a reputable international journal (indexed by Scopus or Thomson Reuters) a maximum of one year after the research contract ends. This research is also expected to produce additional outputs as described in Table 1.

#### C. Research Criteria

Criteria PK-GB criteria follow the following conditions:

1. The research proposal is research whose scientific field is following the scientific field of the Professor who is the Chair of the Researcher;
2. The research period is 1 year with the maximum amount of money referring to the LP2M Proker as shown in Table 1.

#### D. Applicants Requirements

The requirements for proposing PK-GB are as follows:

1. The head of the Applicants is a permanent lecturer and has the position of Professor (Professor) in the Padang State University;
2. The lead Applicants has published experience of at least one article as a *corresponding author* in a reputable international journal; and
3. Research members consist of a maximum of 2 members, one of which has a minimum position of expert assistant and the other minimum has aNIDN.

#### E. Proposal Components

The components of the Professor research proposal are systematically defined as follows.

1. **Research Title.** The study's title should be brief and specific, but sufficiently clear to give an overview of the proposed research.
2. **Cover of proposal** according to the format as attached.
3. **Field of Science.** Write down the field of science of the chief researcher based on the following clusters of knowledge: (1) Education and Educational Sciences, (2) Energy, Science, and Engineering Technology,

- (3) Food, Health, and Sports, (4) Social, Cultural, Art, Sport and Humanities, (4) Disaster and Environment, (5) Resources, Economics and Business, and (6) Social, Arts, Culture, and Humanities.
4. **Abstract (Summary).** Contains no more than 500 words containing the research background, objectives and stages of the research method, targeted outcomes, and descriptions of the proposed research TKT.
  5. **Introduction.** Contains no more than 500 words containing the background and problems to be studied, specific objectives, and the urgency of the research. In this section it is necessary to explain a description of the specific specifications related to the scheme.
  6. **Literature Review.** Literature review is not more than 1000 words by presenting the *state of the art and the(road map road map)* in the field under study. The charts and *road maps are* made in JPG / PNG form inserted in this field. Reference sources / primary references relevant and by prioritizing research results in the latest scientific journals and / or patents. It is recommended to use the library sources for the last 10 years
  7. **Research Methods.** The method or means to achieve predetermined goals should not exceed 600 words. This section is equipped with a research flow chart that illustrates what has been implemented and will be done during the proposed time. The flow chart format can be JPG / PNG files. The research chart must be made in its entirety with clear phases, starting from the beginning, how the process and its outputs are, and the targeted achievement indicators. In this section, each member of the Applicants must also fill in the duties according to the proposed research stage.
  8. **Schedule Research And Costs.** The research schedule is arranged in tabular form like the Research Proposal Template example (See Appendix 5). Research costs are made as detailed as possible in 4 components (Honorarium, Material Shopping, Non-Operational Goods shopping, Travel Shopping).
  9. **Bibliography (Reference).** Bibliography is arranged and written based on a number system following the order of citation. Only references cited on research proposals are listed in the Bibliography. The list of references is compiled based on the name and year system in alphabetical order, the author's name, the year of publication, the title of the article / book, and the place / city of the publisher and publisher institution. For references originating from scientific journals, it is necessary to include the name of the journal, volume and publication number, and the page where the article was published.
  10. **Attachments.** In the appendix, at least (a) research personnel and (b) must be attached, *curriculum vitae of the brief chairperson* and research members least including the identity of the researcher, the subjects taught, educational history, and research and community service experience for the last 5 years, and scientific publications for the last 5 years (books, articles in *proceedings*, articles in journals, and the like).

## **CHAPTER 6**

### **NATIONAL HIGHER EDUCATION COLLABORATIVE RESEARCH**

#### **A. Introduction**

The gap in the quality of the implementation of the tridharma of higher education between several universities requires the implementation of various coaching programs to improve the quality of lecturers, especially in research. To reduce the quality gap between tertiary institutions, especially in the field of research, this is carried out by, among others, facilitating collaborative research between relatively new research groups through the National Higher Education Collaborative Research (PKPT-DN) scheme. The proposing research team (TPP). PKPT comes from universities with lower clusters. TPP partners with universities with research centers and excellent research groups (Team Research Partners / TPM). It is hoped that through this collaboration the quality of TPP research can be further improved. PKPT-DN can be in the form of primary research or applied research with TKT 1-6.

The research objectives of the PKPT-DN are as follows:

1. Providing a forum for TPP lecturers / research groups to be able to take advantage of the facilities, expertise, adopt, and imitate the TPM research culture; and the establishment of
2. cooperation between TPP and TPM in research management.

#### **B. Research Output**

Outputs Obligatory PKPT-DN Basic Research per year in the form of:

1. One international journal article indexed in a reputable database; or One research book with ISBN; or Three proceeding articles indexed in reputable databases; or Three *book chapters* indexed in reputable or ISBN databases.
2. KI or appropriate technology, and others.

The mandatory output of PKPT-DN for Applied Research per year is in the form of:

1. One article in reputable international seminar proceedings.
2. At least one science and technology-sosbud product which can be in the form of a method, *blue print*, prototype, system, policy, model, or appropriate technology that IP protects in the first year; and
3. Documentation of product trial results, prototypes, policies or art performances in the 2nd year.

This research is also expected to produce other outcomes following Table 1.

#### **C. Research Criteria**

criteria PKPT-DN follow the following conditions:

- a. Research proposals are research that can be carried out and developed at the TPP institution after the research program is completed;
- b. The research period is two years and is evaluated at the end of the first year; and
- c. PKPT-DN Financing refers to the LP2M Proker as shown in Table 1;

#### **D. Applicants Requirements**

Requirements for PKPT-DN Applicantss are as follows:

1. TPP consists of a chairperson and a maximum of two members of UNP permanent lecturers who have NIDN;

2. The Chairperson of the TPP has a maximum education of S-2 with a maximum functional position as lecturer;
3. Research members of 1-2 people have a maximum position as Lector of
4. TPM, not the place where TPP took their last education;
5. The research performance cluster of the TPM tertiary institutions must be higher than the TPP colleges;
6. TPP and TPM must come from different PT;
7. TPM consists of a chairman and a member, both of whom have S-3 education;
8. TPM researchers have at least 5 publications as the first author or the *corresponding author* in a proceeding / journal of international repute or one registered IP;
9. Research proposals are made jointly between the TPP and the TPM;
10. TPP proposals must obtain TPM approval; and
11. Not currently in office.
12. The TPP and TPM have a valid MoU, and are still valid, and have agreed and been institutionally signed.
13. TPM must provide matching funds of at least 50%.
14. Include a minimum of 2 (two) students, especially those researching to complete their thesis (at least 6 semesters).

#### **E. Proposal Components**

The following systematics determine this component of the State Universities Collaboration Research proposal.

1. ***Proposal Title***. The research title should be brief and specific, but clear enough and give an overview of the proposed research.
2. ***Cover of proposal*** according to the format as attached.
3. ***Field of Science***. Write down the field of science of the chief researcher based on the following clusters of knowledge: (1) Education and Educational Sciences, (2) Energy, Science, and Engineering Technology, (3) Food, Health, and Sports, (4) Social, Cultural, Art, Sport and Humanities, (4) Disaster and Environment, (5) Resources, Economics and Business, and (6) Social, Arts, Culture, and Humanities.
4. ***Abstract (Summary)***. Contains no more than 500 words containing the research background, objectives and stages of the research method, targeted outcomes, and descriptions of the proposed research TKT.
5. ***Introduction***. Contains no more than 500 words containing the background and problems to be studied, specific objectives, and the urgency of the research. In this section it is necessary to explain a description of the specific specifications related to the scheme.
6. ***Literature Review***. Literature review is not more than 1000 words by presenting the *state of the art* and the *(road map road map)* in the field under study. The charts and *road maps* are made in JPG / PNG form inserted in this field. Reference sources / primary references relevant and by prioritizing research results in the latest scientific journals and / or patents. It is recommended to use the library sources for the last 10 years
7. ***Research Methods***. The method or means to achieve predetermined goals should not exceed 600 words. This section is equipped with a research flow chart that illustrates what has been implemented and will be done during the proposed time.

The flow chart format can be JPG / PNG files. The research chart must be made in its entirety with clear phases, starting from the beginning, how the process and its outputs are, and the targeted achievement indicators. In this section, each member of the Applicants must also fill in the duties according to the proposed research stage.

8. ***Schedule Research And Costs***. The research schedule is arranged in tabular form like the Research Proposal Template example (See Appendix 5). Research costs are made as detailed as possible in 4 components (Honorarium, Material Shopping, Non-Operational Goods shopping, Travel Shopping).
9. ***Bibliography (Reference)***. Bibliography is arranged and written based on a number system following the order of citation. Only references cited on research proposals are listed in the Bibliography. The list of references is compiled based on the name and year system in alphabetical order, the author's name, the year of publication, the title of the article / book, and the place / city of the publisher and publisher institution. For references originating from scientific journals, it is necessary to include the name of the journal, volume and publication number, and the page where the article was published.
10. ***Attachments***. In the appendix, at least (a) research personnel and (b) must be attached, curriculum vitae of the brief chairperson and research members least including the identity of the researcher, the subjects taught, educational history, and research and community service experience for the last 5 years, and scientific publications for the last 5 years (books, articles in *proceedings*, articles in journals, and the like).

## CHAPTER 7

### INTERNATIONAL HIGHER EDUCATION COLLABORATIVE RESEARCH

#### **A. Introduction**

International Higher Education Collaborative Research (PKPT-LN) is intended as a research activity to develop cooperation between lecturers / researchers of Padang State University and lecturers / researchers from various well-known foreign universities. country so that there will be *sharing of ideas* and knowledge in the field of research and science. This study aims to provide a forum for lecturers / researchers to develop their research skills to take advantage of the facilities and expertise and adopt and imitate an excellent research culture from more advanced research groups in well-known overseas universities in carrying out quality research. This research is also intended so that UNP researchers / lecturers can improve the quality of research and the number of publications of their research results in reputable international scientific journals. The PKPT-LN program is considered strategic to increase scientific publications in reputable international journals and expand networks with fellow scientists in the same field.

The PKPT-LN aims to (1) expand the network research of higher education researchers in Indonesia with their partners and fellow scientists abroad so that the use of shared resources and facilities will be sustainably created between institutions; (2) increasing the ability of researchers at Indonesian universities to cooperate with partner institutions abroad; (3) increasing international recognition (*international recognition*) for research carried out; (4) increasing the quality of research and the number of scientific publications in reputable international scientific journals; (5) increasing the *citation index* of Indonesian researchers; (6) improving the quality and competence of lecturers in Indonesian universities; and (7) facilitating university lecturers in Indonesia who are or will carry out research collaborations with partner institutions abroad, especially with developed countries.

The scope of this program covers the following disciplines: (1) Education and Education Sciences, (2) Science, Technology and Engineering, (3) Social, Cultural, Arts, Sport and Humanities, (4) Resources, Economics, and Quality of Life Public. This research is intended for all permanent lecturers at the Universitas Negeri Padang. The Research Scheme for Foreign Universities Collaboration can be Basic, Applied, and Development Research. Foreign PT Cooperation Research can be carried out multilaterally or in the form of a consortium.

The objectives of the PKPT-LN are as follows:

1. Increase and encourage the acceleration of basic, applied and development research at UNP to produce invention, application and development, both methods, theories or policy principles;
2. Improve the quality and competence of researchers in conducting basic, applied and development research at UNP;
3. Improve the quality of the results of basic, applied and development research and produce scientific publications in reputable international scientific journals; and
4. Improve and encourage the ability of researchers at UNP to collaborate with partner institutions abroad.

## **B. Research Output**

Outcomes The compulsory PKPT-LN Basic Research outputs per year are:

1. At least one article in an international journal indexed in a reputable database; or At least one research book has an ISBN; or At least three articles in proceedings indexed in reputable databases; or At least three *book chapters* indexed in reputable or ISBN databases.
2. KI or appropriate technology, and others.

The compulsory outputs of PKPT-LN Applied Research per year are:

1. One article in reputable international seminar proceedings.
2. At least one science and technology-sosbud product which can be in the form of a method, *blue print*, prototype, system, policy, model, or appropriate technology that IP protects in the first year; and
3. Documentation of product trial results, prototypes, policies or art performances in the 2nd year.

The compulsory outputs of PKPT-LN Development Research per year are: First

1. year:
  - a. One article in reputable international proceedings.
  - b. industry-worthy prototypes of science, technology, arts, and culture with KI;
  - c. documents *feasibility study*;
2. Second year industrial acceptance test results; and an article in a reputable international journal. The PKPT-LN research is also expected to produce other outcomes following Table 2.

## **C. Research Criteria**

The PKPT-LN Basic Research Criteria follow the following guidelines:

1. study is multi-year, the study period is 2 years and the outcome will be evaluated annually; and
2. Research funding for each year follows the provisions of LP2M Proker funding as shown in Table 1.
3. Include a minimum of 2 (two) students, especially those who are researching in order to complete their thesis (at least 6 semesters)

The criteria for PKPT-LN Applied Research follow the following guidelines:

1. The research is multi-year, the study period is 2 years and the outcome will be evaluated annually; and
2. Research funding follows the funding provisions based on the LP2M Proker as shown in Table 1.
3. Include a minimum of 2 (two) students, especially those researching to complete their thesis (at least 6 semesters).

The PKPT-LN Development Research Criteria follow the following guidelines:

1. Development Research is multi-year with a research period of 2 years.
2. The output will be evaluated annually; and
3. Each year's research funding follows the funding provisions based on the LP2M Proker as shown in Table 1.
4. Include a minimum of 2 (two) students, especially those carrying out research to complete their thesis (at least 6 semesters).

#### **D. Applicants Requirement**

The requirements for proposing PKPT-LN Basic Research are as follows::

1. Lecturer at UNP; The chairman of the proposer and one of its members has a doctoral degree with a minimum of functional assistant positions, or a master degree with at least a functional position as lecturer;
2. The chief proposer has a publication track record of at least two articles in a reputable indexed database and / or national journal accredited as the first author or corresponding author as evidenced by including the URL of the intended article; and
3. members of the Applicants 1-2 people.
4. Have an MoU with a foreign partner that is valid and still valid, and has been agreed and signed institutionally.
5. Have permission from the State Secretary of the Republic of Indonesia for research activities.
6. PT. Partners must provide matching funds of at least 50%

The requirements for proposing PKPT-LN Applied Research are as follows:

1. The permanent lecturer at UNP and the head of proposer and one of its members has a doctoral education with a minimum functional position as an expert assistant, or a master degree with a minimum functional position as lecturer;
2. The chief Applicants has a publication track record of at least two articles in a reputable indexed database and / or national journal accredited as the first author or corresponding author as evidenced by including the URL of the article in question, or has at least one registered KI status;
3. members of the proposer 1-2 people.
4. Have an MoU with a foreign partner that is valid and still valid, and has been agreed and signed institutionally.
5. Have permission from the State Secretary of the Republic of Indonesia for research activities.
6. PT. Partners must provide matching funds of at least 50%..

The requirements for proposing the PKPT-LN Development Research are as follows:

1. The permanent lecturer at UNP and the head of proposer and one of its members has a doctoral education with a minimum functional position as an expert assistant, or a master degree with a minimum functional position as lecturer;
2. The chief Applicants has a publication track record of at least five articles in an indexed database with a reputation as the first author or the corresponding author as evidenced by including the URL of the article, or at least having one KI status granted;
3. Having investor partners as evidenced by a written statement containing the inclusion of funds committed by partners in the form of in cash at least 10% of the funds raised; and
4. members of the Applicants 1-2 people.
5. Have an MoU with a foreign partner that is valid and still valid, and has been agreed and signed institutionally.
6. Have permission from the State Secretary of the Republic of Indonesia for research activities.
7. PT. Partners must provide matching funds of at least 50%.

## E. Proposal Components

This component of the Foreign Universities Cooperation Research proposal is determined systematically as follows.

1. **Proposal Title.** The research title should be brief and specific, but clear enough and give an overview of the proposed research.
2. **Cover of proposal** according to the format as attached.
3. **Field of Science.** Write down the field of science of the chief researcher based on the following clusters of knowledge: (1) Education and Education, (2) Energy, Science, and Engineering Technology, (3) Food, Health, and Sports, (4) Social, Cultural, Art, Sport and Humanities, (4) Disaster and Environment, (5) Resources, Economics and Business, and (6) Social, Arts, Culture, and Humanities.
4. **Abstract (Summary).** Contains no more than 500 words containing the research background, objectives and stages of the research method, targeted outcomes, and descriptions of the proposed research TKT.
5. **Introduction.** Contains no more than 500 words containing the background and problems to be studied, specific objectives, and the urgency of the research. In this section it is necessary to explain a description of the specific specifications related to the scheme.
6. **Literature Review.** Literature review is not more than 1000 words by presenting the *state of the art and the(road map road map)* in the field under study. The charts and *road maps are* made in JPG / PNG form which is then inserted in this field. Reference sources / primary references that are relevant and by prioritizing research results in the latest scientific journals and / or patents. It is recommended to use the library sources for the last 10 years
7. **Research Methods.** The method or means to achieve predetermined goals should not exceed 600 words. This section is equipped with a research flow chart that illustrates what has been implemented and will be done during the proposed time. The flow chart format can be JPG / PNG files. The research chart must be made in its entirety with clear phases, starting from the beginning, how the process and its outputs are, and the indicators of targeted achievement. In this section, each member of the Applicants must also fill in the duties according to the proposed research stage.
8. **Schedule Research And Costs.** The research schedule is arranged in tabular form like the example in the Research Proposal Template (See Appendix 5). Research costs are made as detailed as possible in 4 components (Honorarium, Material Shopping, Non-Operational Goods shopping, Travel Shopping).
9. **Bibliography (Reference).** Bibliography is arranged and written based on a number system in accordance with the order of citation. Only references cited on research proposals are listed in the Bibliography. The list of references is compiled based on the name and year system in alphabetical order, the name of the author, the year of publication, the title of the article / book, and the place / city of the publisher and publisher institution. For references originating from scientific journals, it is necessary to include the name of the journal, volume and publication number, as well as the page where the article was published.
10. **Attachments.** In the appendix, at least (a) research personnel and (b) must be attached, curriculum *vitae of the brief chairperson* and research members least including the identity of the researcher, the subjects taught, educational history,

and research and community service experience for the last 5 years, and scientific publications for the last 5 years (books, articles in *proceedings*, articles in journals, and the like).

## **F. Proposal Templates**

The proposal template of International Higher Education Collaborative Research the following.

COVER OF PROPOSAL

TABLE OF CONTENTS

ABSTRACT (SUMMARY) (maximum 500 words)

INTRODUCTION (maximum 500 words)

LITERATURE REVIEW (Maximum 1000 words)

RESEARCH METHOD (Maximum 600 words)

SCHEDULE RESEARCH(See sample template)

RESEARCH COSTS

REFERENCES

Appendixes

Appendix 1 Research personnel

Appendix 2 List of CVs (*Curriculum Vitae*) Chairman and Research personnel

Forms of this appendixes can be found in the Appendix of this Research Handbook

## **CHAPTER 8**

### **EXCELLENCE RESEARCH OF HIGHER EDUCATION**

#### **A. Introduction**

One of the objectives of research decentralization policy is to create research excellence in tertiary institutions through the sustainable implementation of the Research Strategic Plan (Renstra) that each PT. The implementation of this research decentralization policy is manifested in the Excellence Research Of Higher Education (PUPT) scheme which has the goal of producing new theories, methods or policies that are used for scientific development. In addition, PUPT is also oriented towards science and technology products that have been validated in the laboratory / field or relevant environment. The ultimate goal of this research is the production of technological innovations in frontier fields and socio-cultural engineering to promote sustainable development at the local and national levels, based on the direction of the UNP Research Master Plan (RIP) 2020-2024.

In addition, the research decentralization policy is also expected to be able to create higher education (PT) research excellence not only in terms of conducting basic or applied research but also development research which leads to the downstreaming of research results. This development research is designed to facilitate the development of PT research results that have been carried out (fundamental / applied) so that they can be applied to the user community. This research is aimed at achieving further development at the model / product / prototype stage that has been tested in an actual environment. Thus PUPT can be in the form of primary research (PUPT-D), applied (PUPT-T), and development (PUPT-P).

The objectives of the Basic PUPT (PUPT-D) are as follows:

1. To increase and encourage the acceleration of basic research in tertiary institutions so as to produce inventions, both new methods, new theories or new policies that have never existed before, at TKT 1-3;
2. Improve the quality and competence of researchers in conducting basic research in tertiary institutions; and
3. Improve the quality of basic research results and produce scientific publications in reputable international scientific journals.

While the objectives of the PUPT Applied (PUPT-T) are as follows:

1. Increase the ability of researchers in the tertiary institutions to produce science, technology, art and culture products, at TKT 4-6;
2. Strengthening the multidisciplinary research roadmap;
3. Building collaboration between universities and partners who use research results;
4. Obtain KI ownership of science, technology, art and culture products.

Meanwhile, the objectives of the PUPT Development (PUPT-P) are as follows:

1. Producing ready-to-apply science, technology, art and culture products characterized by TKT 7-9;
2. Strengthening the multidisciplinary research roadmap that produces commercial products; and
3. Building Partnerships *Academic, Business, Government, and Community* (ABGC).

## **B. Research Outputs**

The mandatory PUPT-D output per year can be in the form of:

1. One article in an international journal indexed in a reputable database; or One research book with ISBN; or Three proceeding articles indexed in reputable databases; or Three *book chapters* indexed in reputable or ISBN databases.
2. KI or appropriate technology, and others.

The PUPT-T mandatory output can be in the form of:

1. One article in a reputable international seminar proceedings.
2. One science and technology and social culture product which can be in the form of a method, *blue print*, prototype, system, policy, model, or appropriate technology that is protected by IP in the first year; and
3. Documentation of product trial results, prototypes, policies or art performances in the second year and thereafter.

The PUPT-P compulsory outputs are as follows:

1. First year:
  - a. One article in reputable international seminar proceedings.
  - b. Industry-worthy prototypes of intellectual science, technology, arts, and culture;
  - c. document *Feasibility study*;
2. Second year industrial acceptance test results; and one article in a reputable international journal.

This PUPT research is also expected to produce additional outcomes according to Table 1.

## **C. Research Criteria**

The criteria for PUPT-D are as follows:

1. The research is multi-year; the research period is 2 years and the outcome will be evaluated annually; and
2. PUPT-D research funding refers to the LP2M Program as listed in Table 1. The

criteria for PUPT-T follow the following guidelines:

1. The study is multi-year; the research period is 2 years and the outcome will be evaluated every year;
2. The PUPT-T research funding refers to the LP2M Program as shown in Table 1.

While the PUPT-P criteria are as follows:

1. The research is multi-year, the research period is 2 years and the outcome will be evaluated every year;
2. Financing for PUPT-P refers to the LP2M Proker as listed in Table 1.

## **D. Requirements for Applicants**

Requirements for Applicants for PUPT-D are as follows:

1. The head of Applicants is a permanent lecturer at UNP;
2. The head of the Applicants has a doctoral minimum of an expert assistant functional position, or a

3. degree with a master's degree with a functional position at least as a lecturer;
4. The chief Applicants has a publication track record of at least two articles in a reputable indexed database and / or in a nationally accredited journal as the first author or *corresponding author as* evidenced by showing the URL of the article intended; and
5. members of the Applicants 1-2 people.
6. Include a minimum of 2 (two) students, especially those who are carrying out research in order to complete their thesis (at least 6 semesters)

Requirements for proposing PUPT-T are as follows:

1. The head Applicants is a permanent lecturer at UNP;
2. Has a doctoral education with a minimum functional position as an assistant professor, or
3. Has a Master degree with a minimum functional position as a lecturer;
4. The head Applicants has a publication track record of at least two articles in a reputable indexed database or a national accredited journal as the first author or *corresponding author as* evidenced by showing the URL of the article, or having at least one KI registered status; and
5. members of the Applicants 1-2 people.
6. Include a minimum of 2 (two) students, especially those carrying out research to complete their thesis (at least at their 6th semester).

While the PUPT-P requirements are as follows:

1. The Applicants is a permanent lecturer at UNP;
2. The head Applicants has a doctoral degree with a minimum functional position as an assistant professor or a master degree with a minimum functional position as a lecturer;
3. The head Applicants has a publication track record of at least five articles in a reputable indexed database as the first author or *corresponding author as* evidenced by showing the URL of the article, or at least having one KI status as *granted*;
4. Having partner investors as evidenced by a statement letter containing a commitment to invest funds by the partner in the form of *in cash* of at least 10% of the proposed funds; and
5. Applicants member 2-3 people.
6. Include a minimum of 2 (two) students, especially those carrying out research to complete their thesis (at least at their 6th semester).

## E. Proposal Components

The component of the Excellence Researches of Higher Education (PUPT) proposal is determined by the following systematics.

1. **Proposal Title.** The research title should be brief and specific but clear enough and give an overview of the proposed research.
2. **Cover of the Proposal** according to the format as attached.
3. **Field of Science.** Write down the field of science of the head researcher based on the leading directions of UNP's research, namely: (1) Digital Learning Services and (2) Minangkabau Culinary (Rendang).
4. **Abstract (Summary).** Contains no more than 500 words containing the research background, objectives and stages of the research method, targeted outcomes, and TKT descriptions of the proposed research
5. **Introduction.** Contains no more than 500 words, including the background and problems to be studied, specific objectives, and the urgency of the research. In this section, it is necessary to explain a description of the particular specifications related to the scheme.
6. **Literature Review.** The literature review is not more than 1000 words by presenting the *state of the art and the road map* in the field being studied. The charts and *road maps* are made in JPG / PNG format, inserted in this field. Reference sources / primary references relevant and focus on the research results in the most recent scientific journals or patents are also included. It is recommended to use the latest library sources (at least for the recent ten years).
7. **Research Methods.** The method or means to achieve predetermined goals should be written by not exceeding 600 words. This section also contains a research flow chart that illustrates what has been implemented and will be done during the proposed time. The flow chart format can be JPG / PNG files. The research chart must be made in its entirety with clear phases, starting from the beginning, how the process and its outputs are, and the targeted achievement indicators. In this section, each member of the Applicants must also fill in the duties according to the proposed research stage.
8. **Research Schedule And Costs.** The research schedule is arranged in tabular form, as shown in the Research Proposal Template (See Appendix 5). Research costs are made as detailed as possible in 4 components (Honorarium, Material Shopping, Non-Operational Goods shopping, Travel Expenses).
9. **Bibliography (Reference).** The bibliography is arranged and written based on a number system following the order of citation. Only references cited on research proposals are

included in the Bibliography. The list of references is compiled based on the name and year system in alphabetical order, the author's name, the year of publication, the title of the article/book, and the place/city of the publisher and publisher institution. For references originating from scientific journals, it is also necessary to include the name of the journal, volume, publication number, and the page where the article was published.

10. **Appendixs.** The appendix, at a minimum, should covers (a) research personnel and (b) the brief *curriculum vitae* of chairperson and research members, which must at least include the identity of the researcher, the subjects being taught, educational history, and research experience and community service for the last five years, and scientific publications for the previous five years (books, articles in *proceedings*, articles in journals, and the like).

## **F. Proposal Template**

The systematics of the Excellent Researches of Higher Education Includes the following.

COVER

TABLE OF CONTENTS

ABSTRACT (SUMMARY) (maximum 500 words)

INTRODUCTION (maximum 500 words)

LITERATURE REVIEW (Maximum 1000 words)

RESEARCH METHOD (Maximum 600 words)

## CHAPTER 9

### NATIONAL COLLABORATIVE RESEARCH

#### A. Introduction

The National Collaborative Research Scheme between Domestic Institutions (PK-AIDN) aims to develop cooperation between higher education institutions, research centers, and UNP lecturers with various domestic agencies, both governmental and non-governmental agencies, especially in West Sumatra Province. There will be synergy and *sharing of ideas*, knowledge and skills in research and science, and it encourages the acceleration of development in the regions. Another purpose of collaborative research with various national institutions is to provide opportunities for lecturers/research groups to take advantage of facilities and expertise, develop a research culture, and increase *income-generating* for research institutions in universities.

Fields of collaborative research between national institutions may include several fields of study as follows: (1) Education and Educational Sciences, (2) Energy, Science and Engineering Technology, (3) Food, Health and Sports, (4) ) Social, Culture, Arts, Sports and Humanities, (4) Disaster and Environment, (5) Resources, Economics and Business, and (6) Social, Arts, Culture and Humanities. This research is intended for all permanent lecturers at the Universitas Negeri Padang.

Research (PK-IDN) is a research scheme whose management is carried out by LP2M Universitas Negeri Padang in collaboration with several national institutions (government/non-government), especially in regencies/cities in West Sumatra Province. This program aims to improve and develop the ability of research lecturers at the Universitas Negeri Padang so that their competence and research sensitivity will grow and be able to produce teaching materials and scientific publications. It also fosters lecturers' productive research and always publishes their research results in scientific journals, especially national scientific journals that are accredited and or reputable international scientific journals. After the research is complete, researchers are required to submit research reports, scientific publication outputs and are expected to be able to continue their research to other, more competitive research programs. PK-AIDN may include research basic and applied research.

#### B. Research Outputs

Basic PK-AIDN compulsory output per year is in the form of:

1. One article in an international journal indexed in a reputable database; or One research book with ISBN; or Three proceeding articles indexed in reputable databases; or Three

*book chapters* indexed in reputable or ISBN databases

2. KI or appropriate technology, and others

The mandatory output of Applied PK-AIDN per year is in the form of:

1. One article in reputable international proceedings
2. At least one science and technology or social science and culture product which can be in the form of a method, *blue print*, prototype, system, policy, model, or appropriate technology that is protected by IP in the first year; and
3. Documentation of product trial results, prototypes, policies, or art performances in the 2nd year

This research is also expected to produce additional outcomes in accordance with Table 1.

### **C. Research Criteria**

PK-AIDN criteria follow the following conditions:

1. Research proposals are research that can be carried out and developed at the TPP institution after the research program is completed;
2. The research period is two years and is evaluated at the end of the first year; and
3. PK-AIDN Financing refers to the LP2M Proker as shown in Table 1;

### **D. Applicants Requirements**

PK-AIDN Applicants requirements are as follows:

1. Applicant consists of a chairperson and a maximum of two members of UNP permanent lecturers who have NIDN;
2. The Applicants Team is educated minimally S2 with a minimum functional position as a lecturer;
3. Research members 1-2 people.
4. TPM consists of a chairperson and a member, both of whom have S-2 education;
5. Research proposals are made jointly between the TPP and the TPM;
6. Not currently in office.
7. The TPP and TPM have a legal MoU, and are still valid, and have agreed and been institutionally signed.
8. TPM must provide matching funds of at least 50%.
9. Include a minimum of 2 (two) students, especially those who are carrying out research to complete their thesis (at least at their 6th semester)

## **E. Proposal Components**

The components of the National Collaborative Research (PK-AIDN) is systematically determined as follows.

1. **Proposal Title.** The research title should be brief and specific but clear enough and give an overview of the proposed research.
2. **Cover of the proposal** according to the format as attached.
3. **Field of Study.** Write down the field of study of the head researcher based on the following clusters of knowledge: (1) Education and Educational Sciences, (2) Energy, Science, and Engineering Technology, (3) Food, Health, and Sports, (4) Social, Cultural, Art, Sport, and Humanities, (4) Disaster and Environment, (5) Resources, Economics and Business, and (6) Social, Arts, Culture, and Humanities.
4. **Abstract (Summary).** Contains no more than 500 words, including the research background, objectives and stages of the research method, targeted outcomes, and descriptions of the proposed research TKT
5. **Introduction.** Contains no more than 500 words, including the background and problems to be studied, specific objectives, and the urgency of the research. In this section, it is necessary to explain a description of the particular specifications related to the scheme.
6. **Literature Review.** The literature review is not more than 1000 words by presenting *state of the art and road map* in the field under study. The charts and *road maps* are made in JPG / PNG format, inserted in this field. Reference sources / primary references that are relevant and prioritize research results in the most recent scientific journals or patents. It is recommended to use the recent ten years' library sources.
7. **Research Methods.** The method or means to achieve predetermined goals should not exceed 600 words. This section is equipped with a research flow chart that illustrates what has been implemented and will be done during the proposed time. The flow chart format can be JPG / PNG files. The research chart must be made in its entirety with clear phases, starting from the beginning, how the process and its outputs are, and the targeted achievement indicators. In this section, each member of the Applicants must also fill in the duties according to the proposed research stage.
8. **Research Schedule And Costs.** The research schedule is arranged in the tabular form like the Research Proposal Template example (See Appendix 5). Research costs are made as detailed as possible in 4 components (Honorarium, Material Shopping, Non-

Operational Goods shopping, Travel Expenses).

9. **Bibliography (Reference).** The bibliography is arranged and written based on a number system following the order of citation. Only references cited on research proposals are included in the Bibliography. The list of references is compiled based on the name and year system in alphabetical order, the author's name, the year of publication, the title of the article/book, and the place/city of the publisher and publisher institution. For references originating from scientific journals, it is also necessary to include the name of the journal, volume, publication number, and the page where the article was published.
10. **Appendix.** In the appendix, at a minimum, (a) research personnel and (b) the brief *curriculum vitae* of chairperson and research members must at least include the identity of the researcher, the subjects being taught, educational history, and research experience, and community service for the last five years, and scientific publications for the previous five years (books, articles in *proceedings*, articles in journals, and the like).

## **F. Proposal Template**

The Systematics of the National Collaborative Research (PK-AIDN) includes the following.

COVER

TABLE OF CONTENTS

ABSTRACT (SUMMARY) (maximum 500 words)

INTRODUCTION (maximum 500 words)

LITERATURE REVIEW (Maximum 1000 words)

RESEARCH METHOD (Maximum 600 words)

RESEARCH SCHEDULE (See sample template)

## CHAPTER 10

### ORDERED RESEARCH

#### A. Introduction

Ordered Research is research in the form of assignments based on research field excellence in higher institutions or based on higher education special needs to increase the productivity of commercialization/downstream of research products protected by intellectual property and are innovative. The ordered research scheme can be in the form of a research scheme *Consortium*, a form of research funding program aimed at increasing the productivity of publications and IP and the commercialization/downstream of research products. This program is also an instrument to accelerate the achievement of UNP policies in realizing the objectives of the UNP Research Strategic Plan. Ordered research can also take the form of a scheme *Strategic Policy Study (KKS)*, which is expected to provide a solid academic foundation in determining strategic policies. Strategic policy studies can be in the form of a review of policies being implemented or an analysis of policies to be taken. A review of existing or implemented policies is expected to provide a robust scientific basis for the necessary improvements. It is hoped that the study of the policies to be taken can provide a robust scientific foundation in the process, context, and substance of the policy. Furthermore, this ordered research scheme can also take the form of a scheme *world-class research (World Class Research = WCR)*, a scheme aimed at improving the quality of publication of articles in reputable international journals to increase citation.

Ordered Research Objectives are as follows:

1. Consortium research aims to establish or strengthen research collaborations with higher education consortiums and research or industrial institutions in a particular field; and produce science, technology, art, and culture products that are ready to be applied characterized by TKT 6-9.
2. The purpose of KKS is to find a solution to a problem that is considered essential and urgent to support the performance of Universitas Negeri Padang.
3. The WCR aims to improve the quality and productivity of scientific articles publication from higher education in reputable international journals and produce superior science and technology.

#### B. Research Output

The mandatory research outputs of Ordered Research are:

1. One article in an international journal indexed Q1 (for the three sub-schemes: consortium, KKS, and WCR).
2. Specifically for consortium research: the first year is an industry-worthy prototype of science, technology, art, and culture with KI and documents *feasibility study*; and in the second year are patents;
3. Especially for KKS research: academic papers which can be in the form of a *policy brief*, policy recommendations, or a strategic policy model for a problem in accordance with the assignment field.
4. Specifically for WCR research: patents.

This research is also expected to produce other outcomes in accordance with Table 1.

### **C. Research Criteria**

The Criteria of ordered research are as follows:

1. The research is multi-year, the research period is two years, and the outcome will be evaluated annually; and
2. Research Funding for Ordered Research refers to the LP2M Work Program as listed in Table 1.

### **D. Requirements for Applicants**

Requirements for Ordered Research Applicants are as follows:

1. The head of the Applicants is a permanent lecturer at UNP;
2. The head of the Applicants has a doctoral degree with a minimum functional position as an assistant professor, or a
3. degree with at least a master degree with a functional position at least as a lecturer;
4. The head Applicants has a publication track record of at least one article in the Q2 indexed journal as the first author or the *corresponding author as* evidenced by showing the URL of the article; and
5. members of the Applicants 1-2 people.
6. Include a minimum of 2 (two) students, especially those carrying out research to complete their thesis (at least at their sixth semesters).

### **E. Proposal Components**

The components of the ordered research proposal is systematically determined as follows.

1. **Proposal Title.** The research title should be brief and specific but clear enough and give an overview of the proposed research.
2. **Cover of the proposal** according to the format as attached.
3. **Field of Science.** Write down the field of science of the head researcher based on the following clusters of knowledge: (1) Education and Science Education, (2) Energy, Science, and Engineering Technology, (3) Food, Health, and Sports, (4) Social, Cultural, Art, Sport and Humanities, (4) Disaster and Environment, (5) Resources, Economics and Business, and (6) Social, Arts, Culture, and Humanities.
4. **Abstract (Summary).** Contains no more than 500 words, including the research background, objectives and stages of the research method, targeted outcomes, and TKT descriptions of the proposed research
5. **Introduction.** Contains no more than 500 words, including the background and problems to be studied, specific objectives, and the urgency of the research. In this section, it is necessary to explain a description of the particular specifications related to the scheme.
6. **Literature Review.** The literature review is not more than 1000 words by presenting *state of the art and the road map* in the field under study. The charts and *road maps* are made in JPG / PNG format, inserted in this field. Reference sources / primary references that are relevant and prioritize research results in the most recent scientific journals or patents. It is recommended to use the recent ten years library sources.
7. **Research Methods.** The method or means to achieve predetermined goals should not exceed 600 words. This section provides a research flow chart that illustrates what has been implemented and will be done during the proposed time. The flow chart format can be JPG / PNG files. The research chart must be made in its entirety with clear phases, starting from the beginning, how the process and its outputs are, and the targeted achievement indicators. In this section, each member of the Applicants must also fill in the duties according to the proposed research stage.
8. **Research Schedule And Costs.** The research schedule is arranged in the tabular form like the Research Proposal Template example (See Appendix 5). Research costs are made as detailed as possible in 4 components (Honorarium, Material Shopping, Non-Operational Goods shopping, Travel Expenses).
9. **Bibliography (Reference).** The bibliography is arranged and written based on a number system following the order of citation. Only references cited on research proposals are included in the Bibliography. The list of references is compiled based on the name and

year system in alphabetical order, the author's name, the year of publication, the title of the article/book, and the place/city of the publisher and publisher institution. For references originating from scientific journals, it is also necessary to include the name of the journal, volume and publication number, as well as the page where the article was published.

10. **Appendix.** In the appendix, at a minimum, (a) research personnel and (b) the brief *curriculum vitae* of chairperson and research members must at least include the identity of the researcher, the subjects being taught, educational history, and research experience, and community service for the last five years, and scientific publications for the previous five years (books, articles in *proceedings*, articles in journals, and the like).

## **F. Proposal Template**

## CHAPTER 11

### BASIC RESEARCH

#### **A. Introduction**

Basic research is categorized into research that produces basic principles from technology, concept formulation, or technology applications, to proof-of-concept of essential analytical and experimental functions or characteristics. This research aims to produce new theories, methods, or policy principles that are used for scientific development. Basic research can be oriented to explanations or discoveries (inventions) in order to anticipate new symptoms/phenomena, rules, models, or postulates that support a process of technology, health, agriculture, etc. in order to support applied research. This Basic Research Scheme can be carried out for collaborative research from within or outside the country. Research on foreign cooperation can be carried out multilaterally or in the form of a consortium. In the TKT measurement process, Basic Research results will be at level 1 to level 3.

The objectives of the Basic Research are as follows:

1. To increase and encourage the acceleration of basic research in higher institutions to produce inventions, both methods, new theories or new policy principles that have never been there before, on the TKT 1-3 measurements;
2. To improve the quality and competence of researchers in conducting basic research in tertiary institutions;
3. To improve the quality of basic research results and produce scientific publications in reputable international scientific journals; and
4. To enhance and encourage researchers' ability in tertiary institutions to collaborate with partner institutions at home or abroad.

#### **B. Research Outputs**

The mandatory Basic Research output per year can be in the form of:

1. at least one article in an international journal indexed in a reputable database; or
2. at least one research book with ISBN; or
3. at least three articles in proceedings indexed in reputable databases; or
4. at least three *book chapters* indexed in reputable databases or with ISBNs.

This research is also expected to produce additional outcomes in accordance with Table

1.

### **C. Research Criteria**

The basic research criteria are as follows:

1. The research is multi-year, the research period is two years, and the outcome will be evaluated annually; and
2. Funding for Basic Research research refers to the LP2M Proker as listed in Table 1.

### **D. Requirements for Applicants**

Requirements for Applicants for Basic Research are as follows:

1. The head of the Applicants is a permanent lecturer at UNP;
2. The head of the Applicants has a doctoral degree with a minimum functional position as an assistant professor, or a
3. degree with at least a master degree with a functional position at least as a lecturer;
4. The chief Applicants has a publication track record of at least two articles in a reputable indexed database or a nationally accredited journal as the first author or corresponding author as evidenced by showing the URL of the article in question; and
5. members of the Applicants 1-2 people.
6. Include a minimum of 2 (two) students, especially those who are carrying out research to complete their thesis (at least at their sixth semesters)

### **E. Proposal Components**

The components of this Basic Research proposal are systematically determined as follows.

1. **Proposal Title.** The research title should be brief and specific but clear enough and give an overview of the proposed research.
2. **Cover of the Proposal** according to the format as attached.
3. **Field of Science.** Write down the field of science of the head researcher based on the following clusters of knowledge: (1) Education and Educational Sciences, (2) Energy, Science, and Engineering Technology, (3) Food, Health, and Sports, (4) Social, Cultural, Art, Sport, and Humanities, (4) Disaster and Environment, (5) Resources, Economics and Business, and (6) Social, Arts, Culture, and Humanities.
4. **Abstract (Summary).** Contains no more than 500 words containing the research background, objectives and stages of the research method, targeted outcomes, and TKT descriptions of the proposed research
5. **Introduction.** Contains no more than 500 words containing the background and problems to be studied, specific objectives, and the urgency of the research. In this

section it is necessary to explain a description of the particular specifications related to the scheme.

6. **Literature Review.** The literature review is not more than 1000 words by presenting the *state of the art and the road map* in the field being studied. The charts and *road maps* are made in JPG / PNG format, inserted in this field. Reference sources / primary references relevant and focus on the research results in the most recent scientific journals or patents are also included. It is recommended to use the latest library sources (at least for the recent ten years).
7. **Research Methods.** The method or means to achieve predetermined goals should be written by not exceeding 600 words. This section also contains a research flow chart that illustrates what has been implemented and will be done during the proposed time. The flow chart format can be JPG / PNG files. The research chart must be made in its entirety with clear phases, starting from the beginning, how the process and its outputs are, and the targeted achievement indicators. In this section, each member of the Applicants must also fill in the duties according to the proposed research stage.
8. **Research Schedule And Costs.** The research schedule is arranged in tabular form, as shown in the Research Proposal Template (See Appendix 5). Research costs are made as detailed as possible in 4 components (Honorarium, Material Shopping, Non-Operational Goods shopping, Travel Expenses).
9. **Bibliography (Reference).** The bibliography is arranged and written based on a number system following the order of citation. Only references cited on research proposals are included in the Bibliography. The list of references is compiled based on the name and year system in alphabetical order, the author's name, the year of publication, the title of the article/book, and the place/city of the publisher and publisher institution. For references originating from scientific journals, it is also necessary to include the name of the journal, volume, publication number, and the page where the article was published.
10. **Appendixs.** The appendix, at a minimum, should covers (a) research personnel and (b) the brief *curriculum vitae* of chairperson and research members, which must at least include the identity of the researcher, the subjects being taught, educational history, and research experience and community service for the last five years, and scientific publications for the previous five years (books, articles in *proceedings*, articles in journals, and the like).

## **CHAPTER 12**

### **APPLIED RESEARCH**

#### **A. Introduction**

Applied research aims at finding solutions to problems that exist in society, industry, and government as a continuation of basic research. Applied Research is a research model that is more geared towards creating innovation and the development of science and technology. This research is oriented towards science and technology products that have been validated in a laboratory/field environment or a relevant environment.

In the TKT measurement process, Applied Research results will be at level 4 to level 6. The objectives of Applied Research are as follows:

1. to increase the ability of researchers in higher institutions to produce products of science, technology, arts, and culture;
2. to strengthen multidisciplinary research roadmaps;
3. to build collaboration between universities and partners who use research results;
4. to improve and encourage the ability of researchers in higher institutions to collaborate with partner institutions at home or abroad; and
5. to obtain ownership of KI for science, technology, art, and culture products.

#### **B. Research Outputs**

Mandatory Applied Research outputs include:

1. at least one science and technology and social culture product which can be in the form of methods, *blueprints*, prototypes, systems, policies, models, or appropriate technology protected by IP in the first year; and
2. documentation of product trial results, prototypes, policies, or art performances in the 2nd and upcoming years.

This research is also expected to produce other outcomes in accordance with Table 1.

#### **C. Research Criteria**

The criteria for applied research are as follows:

1. The research is multi-year, the research period is two years, and the outcome will be evaluated annually; and
2. Financing for Applied Research refers to the LP2M Program as listed in Table 1.

#### **D. Requirements for Applicants**

Requirements for Applicants for Applied Research are as follows:

1. The head of the Applicants is a permanent lecturer at UNP;
2. Have a doctoral education with a minimum functional position as an expert assistant, or a
3. Master degree with a minimum functional position as a lecturer;
4. The chief Applicants has a publication track record of at least two articles in a reputable indexed database or a national accredited journal as the first author or *corresponding author* as evidenced by showing the URL of the article in question, or having at least one KI registered status; and
5. members of the Applicants 1-2 people.
6. Include a minimum of 2 (two) students, especially those carrying out research to complete their thesis (at least at their sixth semesters).

#### **E. Proposal Components**

The following systematics determine the component of the Applied Research proposal.

1. **Proposal Title.** The research title should be brief and specific but clear enough and give an overview of the proposed research.
2. **Cover of the Proposal** according to the format as attached.
3. **Field of Science.** Write down the field of science of the head researcher based on the following clusters of knowledge: (1) Education and Educational Sciences, (2) Energy, Science, and Engineering Technology, (3) Food, Health, and Sports, (4) Social, Cultural, Art, Sport, and Humanities, (4) Disaster and Environment, (5) Resources, Economics and Business, and (6) Social, Arts, Culture, and Humanities.
4. **Abstract (Summary).** Contains no more than 500 words including the research background, objectives and stages of the research method, targeted outcomes, and TKT descriptions of the proposed research
5. **Introduction.** Contains no more than 500 words including the background and problems to be studied, specific objectives, and the urgency of the research. In this section, it is necessary to explain a description of the particular specifications related to the scheme.
6. **Literature Review.** Literature review is not more than 1000 words by presenting *state of the art* and the *road map* in the field under study. The charts and *road maps* are made in JPG / PNG form inserted in this field. Reference sources / primary references that are relevant and by prioritizing research results in the latest scientific journals or

patents. It is recommended to use the recent ten years' library sources.

7. **Research Methods.** The method or means to achieve predetermined goals should not exceed 600 words. This section is equipped with a research flow chart illustrating what has been implemented and will be done during the proposed time. The flow chart format can be JPG / PNG files. The research chart must be made in its entirety with clear phases, starting from the beginning, how the process and its outputs are, and the targeted achievement indicators. In this section, each member of the Applicants must also fill in the duties according to the proposed research stage.
8. **Research Schedule And Costs.** The research schedule is arranged in tabular form like the Research Proposal Template example (See Appendix 5). Research costs are made as detailed as possible in 4 components (Honorarium, Material Shopping, Non-Operational Goods shopping, Travel Expenses).
9. **Bibliography (Reference).** The bibliography is arranged and written based on a number system following the order of citation. Only references cited on research proposals are included in the Bibliography. The list of references is compiled based on the name and year system in alphabetical order, the author's name, the year of publication, the title of the article/book, and the place/city of the publisher and publisher institution. For references originating from scientific journals, it is also necessary to include the name of the journal, volume, publication number, and the page where the article was published.
10. **Appendix.** In the appendix, at a minimum, (a) research personnel and (b) the brief *curriculum vitae* of chairperson and research members must at least include the identity of the researcher, the subjects being taught, educational history, and research experience, and community service for the last five years, and scientific publications for the previous five years (books, articles in *proceedings*, articles in journals, and the like).

## **CHAPTER 13**

### **DEVELOPMENT RESEARCH**

#### **A. Introduction**

Development research aims to achieve further development at the model/product/prototype stage tested in an actual environment. Development research is a research model that is more geared towards developing commercial products. In this study, the involvement of partners as investors is required. In the process of measuring TKT, the results of development research are at TKT 7 to 9. The objectives of Development Research are as follows:

1. to produce scientific, technological, artistic, and cultural products that are ready to be applied characterized by TKT 7-9;
2. to realize technology roadmaps or multidisciplinary research results that produce commercial products;
3. to build partnerships *Academic, Business, Government, and Community (ABGC)*; and
4. to enhance and encourage researchers' ability in higher institutions to collaborate with partner institutions at home or abroad.

#### **B. Research Outputs**

The compulsory research and development outputs are as follows:

1. first-year:
  - a) industry-worthy prototypes of science, technology, arts, and culture that are KI;
  - b) documents *feasibility study*;
2. the second year the results of the industrial acceptance test; and
3. the third year of the *business plan*.

This research is also expected to produce other outcomes in accordance with Table 1.

#### **C. Research Criteria**

The criteria for development research are as follows:

1. The research is multi-year, the research period is two years, and the outcome will be evaluated annually;
2. Development Research Financing refers to the LP2M Proker as shown in Table 1.

#### **D. Applicants Requirements**

Requirements for Applicants for Development Research are as follows:

1. The head of the Applicants is a permanent lecturer at UNP;
2. The head Applicants has a doctoral degree with a minimum functional position as an assistant professor, or a master degree with a minimum functional position as a lecturer;
3. The chief Applicants has a publication track record of at least five articles in an indexed database with a reputation as the first author or *corresponding author as* evidenced by showing the URL of the article, or at least having one KI status *granted*;
4. Having investor partners as evidenced by a written statement containing the inclusion of funds committed by partners in the form of *in cash* at least 10% of the funds raised; and
5. members of the Applicants 2-3 people.
6. Include a minimum of 2 (two) students, especially those carrying out research to complete their thesis (at least at their sixth semesters).

#### **E. Proposal Components**

The Components of this Research Development proposal are systematically defined as follows.

1. **Proposal Title.** The research title should be brief and specific but clear enough and give an overview of the proposed research.
2. **Cover of the Proposal** according to the format as attached.
3. **Field of Science.** Write down the field of science of the head researcher based on the following clusters of knowledge: (1) Education and Educational Sciences, (2) Energy, Science, and Engineering Technology, (3) Food, Health, and Sports, (4) Social, Cultural, Art, Sport, and Humanities, (4) Disaster and Environment, (5) Resources, Economics and Business, and (6) Social, Arts, Culture, and Humanities.
4. **Abstract (Summary).** Contains no more than 500 words including the research background, objectives and stages of the research method, targeted outcomes, and TKT descriptions of the proposed research
5. **Introduction.** Contains no more than 500 words including the background and problems to be studied, specific objectives, and the urgency of the research. In this section, it is necessary to explain a description of the particular specifications related to the scheme.
6. **Literature Review.** The literature review is not more than 1000 words by presenting *state of the art and the road map* in the field under study. The charts and *road maps*

are made in JPG / PNG format, inserted in this field. Reference sources / primary references that are relevant and prioritize research results in the most recent scientific journals or patents. It is recommended to use the current ten years library sources.

7. **Research Methods.** The method or means to achieve predetermined goals should not exceed 600 words. This section provides a research flow chart that illustrates what has been implemented and will be done during the proposed time. The flow chart format can be JPG / PNG files. The research chart must be made in its entirety with clear phases, starting from the beginning, how the process and its outputs are, and the targeted achievement indicators. In this section, each member of the Applicants must also fill in the duties according to the proposed research stage.
8. **Research Schedule And Costs.** The research schedule is arranged in the tabular form like the Research Proposal Template example (See Appendix 5). Research costs are made as detailed as possible in 4 components (Honorarium, Material Shopping, Non-Operational Goods shopping, Travel Expenses).
9. **Bibliography (Reference).** The bibliography is arranged and written based on a number system following the order of citation. Only references cited on research proposals are included in the Bibliography. The list of references is compiled based on the name and year system in alphabetical order, the author's name, the year of publication, the title of the article/book, and the place/city of the publisher and publisher institution. For references originating from scientific journals, it is also necessary to include the name of the journal, volume and publication number, as well as the page where the article was published.
10. **Appendix.** In the appendix, at a minimum, (a) research personnel and (b) the brief *curriculum vitae* of chairperson and research members must at least include the identity of the researcher, the subjects being taught, educational history, and research experience, and community service for the last five years, and scientific publications for the previous five years (books, articles in *proceedings*, articles in journals, and the like).

## **F. Proposal Template**

The proposal of Development Research Includes the following.

COVER

TABLE OF CONTENTS

ABSTRACT (SUMMARY) (maximum 500 words)

INTRODUCTION (maximum 500 words)

LITERATURE REVIEW (Maximum 1000 words)

RESEARCH METHOD (Maximum 600 words)

RESEARCH SCHEDULE (See sample template)

RESEARCH COSTS

REFERENCES

APPENDIX

Appendix 1 Research personnel

Appendix 2 List of CVs(*curriculum vitae*) of the Head Researcher and Research Members.

The format can be found in the Appendix of this Handbook.

**Continuation Proposal:**

COVER

TABLE OF CONTENTS

ABSTRACT (SUMMARY) (maximum 500 words)

INTRODUCTION (maximum 500 words)

## **CHAPTER 14**

### **INSTITUTES' RESEARCH**

#### **A. Introduction**

Institutes Research is research based on specific scientific fields which is the focus or interest of research centers in the UNP environment which can only be followed by the research centers in order to improve the quality and development of scientific and institutional centers. One indicator of increasing quality and scientific and institutional development of research centers is the birth of scientific publications (articles) in reputable international journals.

The research objectives of the Institutes' Research are as follows:

1. Improve quality and develop science which is the focus and interest of the study centers within the UNP Padang;
2. Increase the quantity and quality of scientific publications of research centers within UNP in reputable international journals, especially those indexed by Scopus or Thomson Reuters.

#### **B. Research Outputs**

The mandatory Institutes Research output is the publication of one article in reputable international seminar proceedings in the first year and one scientific article in a reputable international journal of at least Q2 (indexed by Scopus or Thomson Reuters) a maximum of one year after the research contract ends. This research is also expected to produce additional outputs, as described in Table 1.

#### **C. Research Criteria**

Institutes Research criteria follow the following conditions:

1. The proposed research is research whose scientific field is in accordance with the focus and scientific interest of the study center;
2. The research period is one year, with the maximum amount of money referring to the LP2M Proker as listed in Table 1.

#### **D. Applicants Requirements**

Institutes Research Applicants requirements are as follows:

1. The head of the Applicants is a permanent lecturer at Padang State University;
2. The Head Applicants has publishing experience of at least one article as the first author

- or *corresponding author* in a reputable international proceeding/journal; and
3. Research members consist of a maximum of 2 members, with a minimum position of assistant professor.

### **E.Proposal Components**

The proposal components of the Postgraduate Team research are systematically defined as follows.

11. **Research Title.** The title of the study should be brief and specific, but sufficiently clear to give an overview of the proposed research.
12. **Cover of the proposal** according to the format as attached.
13. **Field of Study.** Write down the field of study of the head researcher based on the following clusters of knowledge: (1) Education and Educational Sciences, (2) Energy, Science, and Engineering Technology, (3) Food, Health, and Sports, (4) Social, Cultural, Art, Sport, and Humanities, (4) Disaster and Environment, (5) Resources, Economics and Business, and (6) Social, Arts, Culture, and Humanities.
14. **Abstract (Summary).** Contains no more than 500 words, including the research background, objectives and stages of the research method, targeted outcomes, and descriptions of the proposed research TKT
15. **Introduction.** Contains no more than 500 words, including the background and problems to be studied, specific objectives, and the urgency of the research. In this section, it is necessary to explain a description of the particular specifications related to the scheme.
16. **Literature Review.** The literature review is not more than 1000 words by presenting *state of the art and road map* in the field under study. The charts and *road maps* are made in JPG / PNG format, inserted in this field. Reference sources / primary references that are relevant and prioritize research results in the most recent scientific journals or patents. It is recommended to use the recent ten years' library sources.
17. **Research Methods.** The method or means to achieve predetermined goals should not exceed 600 words. This section is equipped with a research flow chart that illustrates what has been implemented and will be done during the proposed time. The flow chart format can be JPG / PNG files. The research chart must be made in its entirety with clear phases, starting from the beginning, how the process and its outputs are, and the targeted achievement indicators. In this section, each member of the Applicants must also fill in the duties according to the proposed research stage.

18. **Research Schedule And Costs.** The research schedule is arranged in the tabular form like the Research Proposal Template example (See Appendix 5). Research costs are made as detailed as possible in 4 components (Honorarium, Material Shopping, Non-Operational Goods shopping, Travel Expenses).
19. **Bibliography (Reference).** The bibliography is arranged and written based on a number system following the order of citation. Only references cited on research proposals are included in the Bibliography. The list of references is compiled based on the name and year system in alphabetical order, the author's name, the year of publication, the title of the article/book, and the place/city of the publisher and publisher institution. For references originating from scientific journals, it is also necessary to include the name of the journal, volume, publication number, and the page where the article was published.
20. **Appendix.** In the appendix, at a minimum, (a) research personnel and (b) the brief *curriculum vitae* of chairperson and research members must at least include the identity of the researcher, the subjects being taught, educational history, and research experience, and community service for the last five years, and scientific publications for the previous five years (books, articles in *proceedings*, articles in journals, and the like).

## **CHAPTER 15**

### **INDEPENDENT RESEARCH**

#### **A. Introduction**

Independent research is research initiated and carried out by lecturers/researchers in accordance with the scientific field and the needs of each lecturer/researcher whose funding is provided by the lecturer/researcher concerned. Research may be carried out by any UNP lecturer/researcher. It will be validated and counted as part of Tridharma Perguruan Tinggi (the threefold mission of higher education) task by LP2M if it meets the predetermined criteria. Independent Research is a research scheme whose management is carried out by lecturers/researchers and endorsed by LP2M Universitas Negeri Padang. This program is intended to improve and develop research lecturers' ability at the Universitas Negeri Padang. Their competence and research sensitivity will grow and be able to produce teaching materials and scientific publications, as well as foster a productive research culture that always publishes their research results in scientific journals, especially accredited national scientific journals or reputable international scientific journals.

#### **B. Research Criteria and Requirements**

The criteria and requirements for this Independent Research are defined as follows.

1. The researcher is a permanent lecturer at the Universitas Negeri Padang.
2. The Head Researcher has a minimum position of Lecturer or a Doctorate (S3).
3. Research is original.
4. The maximum number of the research team is three people, consisting of 1 chairman and two members.
5. Research must be relevant to the field of science being occupied and the subject being taught.
6. Independent Research Assessment is carried out by reviewers who are SK by the chancellor.
7. The research report is made in 2 (two) copies and submitted to LP2M Padang State University for archiving.

### **C. Research Outputs**

The expected outputs of this study are as follows.

1. Articles in national seminar proceedings or accredited national journals or international journals
2. IPR or Teaching Materials / Textbook sections or Prototypes or Appropriate Technology, Models

### **D. Research Proposal Components**

The components of this Independent Research proposal are systematically defined as follows.

1. **Research Title.** The research title should be brief and specific but clear enough and give an overview of the proposed research.
2. **Cover of the Proposal** according to the format as attached.
3. **Field of Science.** Write down the field of science of the head researcher based on the leading directions of UNP research, such as (1) Education and Educational Sciences, (2) Energy, Science, and Engineering Technology, (3) Food, Health, and Sports, (4) Social, Culture, Arts, Sports and Humanities, (4) Disaster and Environment, (5) Resources, Economics and Business, and (6) Social, Arts, Culture, and Humanities.
4. **Abstract (Summary).** Contains no more than 500 words including the research background, objectives and stages of the research method, targeted outcomes, and TKT descriptions of the proposed research
5. **Introduction.** Contains no more than 500 words including the background and problems to be studied, specific objectives, and the urgency of the research. In this section, it is necessary to explain a description of the particular specifications related to the scheme.
6. **Literature Review.** The literature review is not more than 1000 words by presenting *state of the art* and the *road map* in the field under study. The charts and *road maps* are made in JPG / PNG format, inserted in this field. Reference sources / primary references that are relevant and prioritize research results in the most recent scientific journals or patents. It is recommended to use the current ten years library sources.
7. **Research Methods.** The method or means to achieve predetermined goals should not exceed 600 words. This section provides a research flow chart that illustrates what has

been implemented and will be done during the proposed time. The flow chart format can be JPG / PNG files. The research chart must be made in its entirety with clear phases, starting from the beginning, how the process and its outputs are, and the targeted achievement indicators. In this section, each member of the Applicants must also fill in the duties according to the proposed research stage.

8. **Research Schedule And Costs.** The research schedule is arranged in the tabular form like the Research Proposal Template example (See Appendix 5). Research costs are made as detailed as possible in 4 components (Honorarium, Material Shopping, Non-Operational Goods shopping, Travel Expenses).
9. **Bibliography (Reference).** The bibliography is arranged and written based on a number system following the order of citation. Only references cited on research proposals are included in the Bibliography. The list of references is compiled based on the name and year system in alphabetical order, the author's name, the year of publication, the title of the article/book, and the place/city of the publisher and publisher institution. For references originating from scientific journals, it is also necessary to include the name of the journal, volume and publication number, as well as the page where the article was published.
10. **Appendix.** In the appendix, at a minimum, (a) research personnel and (b) the brief *curriculum vitae* of chairperson and research members must at least include the identity of the researcher, the subjects being taught, educational history, and research experience, and community service for the last five years, and scientific publications for the previous five years (books, articles in *proceedings*, articles in journals, and the like).

## CHAPTER 16

### CLOSING

Completion of this Handbook goes through a relatively long process and goes through repeated stages of refinement. The notes on the implementation of research and community service using the previous handbook edition are invaluable enrichment materials. The dynamics of the development needs of research focus and community service in various fields have also been accommodated in this Guide by formulating several new schemes.

Thanks to the entire compilation project team's hard work, the 2020 Revised Edition Research Handbook was finally completed. To that end, we should be grateful to God Almighty for His favors in making things easier to complete the project.

This handbook is an apparent reference in the implementation of research and community service activities, especially for lecturers as the main actors of research and community service activities. This handbook is also an apparent reference for research activities administrators at UNP, including a team of experts who guide the selection process to the reporting stage. With reference to this handbook, the research activities stakeholders(*stakeholders*) can function correctly.

- This guideline has been adapted to the application of grant management with Information and Communication Technology (ICT) based starting from the process of proposal, selection, implementation, monitoring, and evaluation to reporting. With an ICT-based management system, supported by clear guidelines, it has been proven that research and community service can be managed efficiently, transparency and accountability.

Although this handbook has been written well, it does not rule out the possibility of imperfections. For this reason, suggestions and criticisms are highly expected for the perfection of this handbook for the coming period. Hopefully, this handbook can oversee research activities at UNP so that it can produce outputs that can make a meaningful contribution to raising UNP's competitiveness at the national and international levels.

<b>No.</b>	<b>Full Name</b>	<b>Functional Position</b>	<b>Study Program</b>	<b>Time Allocation (Hour / Week)</b>
1.				
2.				
3. etc.				

### Appendix 3. Example of Research Cost Appendix Format

The research plan budget proposal is planned to refer to the Regulation of the Minister of Finance of the Republic of Indonesia Number 69 / PMK.02 / 2018, concerning Standard Output Cost for Fiscal year 2019.

#### Estimated Research Budget Proposal

No.	Types of Expenditures	Proposed (Rp)		
		Year 1	Year 2 *	Year 3 *
1	Honorarium for laboratory personnel, data collectors, data processing, operator fees, and system builder fees (maximum 30% and paid according to the provisions )			
2	Purchase of consumables for stationery, photocopies, correspondence, a compilation of reports, printing, binding reports, publications, credit, internet, laboratory materials, journal subscriptions (maximum 40%)			
3	Travel Cost for survey/ data sampling, seminars/workshop (domestic/international), accommodation-costs consumption, lump sum, transportation (maximum 40%)			
4	Rent for laboratory equipment/machines/space, vehicles, experimental gardens, other research support equipment (maximum 40%)			
	<b>Amount</b>			

\* specifically for multi-year research

**Appendix 4. Example of Chairman's and Members of Research CVs (Curriculum Vitae) Appendix Format**

Curriculum Vitae should include the following:

- a. Personal Information (Identity)
- b. Subjects taught
- c. Educational history
- d. Research experience and community service in the last five years
- e. Scientific publications in the last five years (books, articles in proceedings, articles in journals, and the like)

The Curriculum vitae of the chairman and member of the research need to have the date and signature originally written and signed by them (in blue ballpoint pen as much as possible).

**Appendix 5. Research Proposal Template**

Summary contains no more than 500 words containing the research background, objectives and stages of the research method, targeted outcomes, and TKT descriptions of the proposed

**SUMMARY**

.....  
.....  
.....  
.....  
.....  
.....  
.....

Keywords are a maximum of five words

Keyword 1; Keyword 2; etc.....

Introduction contains no more than 500 words, including the background and problems to be studied, specific objectives, and the urgency of the research. In this section, it is necessary to explain a description of the particular specifications related to the scheme.

**INTRODUCTION**

.....  
.....  
.....  
.....  
.....  
.....

The literature review is not more than 1000 words by presenting the *state of the art and the road map* in the field being studied. The charts and *road maps* are made in JPG / PNG format, inserted in this field. Reference sources / primary references relevant and focus on the research results in the most recent scientific journals or patents are also included. It is recommended to use the latest library sources (at least for the recent ten years).

**FEES**

Research costs are made as detailed as possible in 4 components (Honorarium, Material Shopping, Non-Operational Goods shopping, Travel Expenses).

The bibliography is arranged and written based on a number system following the order of citation. Only references cited on research proposals are included in the Bibliography.

3	Binding color	Based on the color of each faculty
4	Validation Sheet	Attached format
5	Appendices: at least attaching (a) Research Personnel, (b) Research Implementation Schedule, (c) Estimated Proposals budget research, and (d) curriculum vitae of chairman and members of the researcher	In researchers' curriculum vitae should be reflected their track record in the Field of Study
6	Number of Proposals	2 (two) copies
7	Proposal, Report and Outcomes	Uploaded through the Application LP2M

### Appendix 8. The Comparison (Change) of 2019 and 2020 PNBPN Research Scheme

Year	2019		2020	
	Research Scheme	Sub scheme	Research Scheme	Sub scheme
1.	Young Lecturers Research ( PDP)	PDP	Young Lecturer Research ( PDP)	PDP
2.	Postgraduate Team Research (PTPs)	PTM PDD	Postgraduate Team Research (PTPs)	PTM PDD
3.	National Higher Education Collaborative Research (PKPT-DN)	Basic  Applied	National Higher Education Collaborative Research (PKPT-DN)	Applied  Development
4.	Professor Research (PK-GB)	-	Professor Research (PK-GB)	-
5.	International Higher Education Collaborative Research (PKPT-LN)	Basic Applied Development	International Higher Education Research Collaboration (PKPT-LN)	Basic Applied Development

6.	Excellence Higher Education Research (PUPT)	Basic	Excellence Higher Education Institution Research (PUPT) (Specifically for Digital Learning and Minang Culinary)	Basic
7.	National Collaborative Research (PK-AIDN)	Applied	National Collaborative Research (PK-AIDN)  Ordered Research (Innovative)  Basic Research  Applied Research	Applied
	-	Development		Development
	-	Basic		Basic
8.	-	Applied		Applied
9.	-	-		Kons; KKS, WCR
10.	-	-	-	
11.	-	-	Development Research	-
12.	-	-	Institutes' Research	-

**Note:** —→ : Specifically for continued research in 2019 to 2020 of PUPT scheme (Basic, Applied and Development) that pass the verification, except Digital Learning and Minang Culinary, directed to continue it through basic, or Applied, or Development research scheme (points 9, 10, 11).

## Appendix 9. RESEARCH SUPPORTING FORMATS

### PROPOSAL EVALUATION FORM OF YOUNG LECTURER RESEARCH

Research Title : .....

Field of Study : .....

Faculty/ University : .....

Study Program : .....

Head Researcher

    a. Full Name : .....

    b. NIDN : .....

    c. Functional Position : .....

Research Member : ..... people

Research Duration : .....years

Research Costs

    a. Proposed to Faculty / UNP : Rp .....

    b. Recommended : Rp .....

No	Evaluation Criteria	Quality (%)	Score	Value
1	Formulation of Problem: a. Accuracy of problem formulation b. Research Objectives	25		
2	Possible research output: a. Scientific publication b. Development of Technology and Science and Social Culture c. Enrichment of Teaching Materials	25		
3	Research method - Accuracy and conformity of the method used	25		
4	Literature review: a. Relevance b. Sophistication c. Bibliography	15		
5	Research Expedience: a. Time Conformity b. Cost Conformity c. Personnel Conformity	10	•	
<b>Total</b>		100		

**Description :**

Score: 1, 2, 3, 5, 6, 7 (1 = Bad; 2 = Very less; 3 = Less; 5 = adequate; 6 = good; 7 = very good);

Value = Quality x Score

**Description:**

1. Score: 1, 2, 3, 5, 6, 7 (1 = bad, 2 = very Less, 3 = Less, 5 = enough, 6 = good, 7 = very good)
2. The scoring of evaluation is adjusted by looking at the planned targets to the achievements at the time the monitoring and evaluation is carried out. The monitor and evaluator must see evidence of output achievement. As a reference for scoring can use the following conditions.
3. Publication of Proceedings / Reputable International Journal: Score 7 = published / accepted, 6 = reviewed, 5 = submitted, 3 = draft, 2 = none. (If the planned target has reached the published / accepted stage)
4. Teaching materials or textbook sections that can be used for University students / students. Score 7 = published, 6 = Editing, 5 = draft, 3 = none (if the planned target has reached the published stage)
5. Science and technology-social and cultural products in the form of methods, blue prints, prototypes, systems, policies, models, or appropriate technology: Score 7 = implementation, 6 = product, 5 = draft, 3 = none (if the planned target has reached the implementation stage)
6. Copyright (IPR): Score 7 = published, 6 = proposed, 5 = draft, 3 = none (if the planned target is up to the published stage)

**Description:**

1. Score: 1, 2, 3, 5, 6, 7 (1 = bad, 2 = very less, 3 = less, 5 = adequate, 6 = good, 7 = very good)
2. The scoring of the evaluation is adjusted by looking at the planned targets to the achievements at the time the monitoring and evaluation is carried out. The monitor and evaluator must see evidence of output achievement. As a reference for scoring can use the following conditions.
3. International scientific publication/Book/Book Chapter: Score 7 = published / accepted, 6 = reviewed, 5 = submitted, 4 = draft, 3 = none. (If the planned target reaches the published / accepted stage)
4. One science and technology-social and culture product which can be method, blue print, prototype, system, policy, model or appropriate technology protected by KI : Score 7 = implementation, 6 = product, 5 = draft, 4 = none. (if the planned target reaches the implementation stage)
5. Textbook / Teaching materials: Score 7 = published / editing process, 6 = draft, 5 = none (if the planned target has reached the published stage)
